DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pigott et al., U. S. Patent 5,251,753 in view of Hunt et al., U. S. Patent 6,286,683. Pigott teaches shipping unit comprising a base portion 16, articles PC to be transported, edge protectors 26, and retaining means in the form of shrink-wrap TF. Pigott does not teach the structure of the claimed corner/edge protector.

Hunt teaches a corner post comprising a pair of non-parallel first arms defined by ends 43 and 44 and a second pair of arms 40 and 42. (See figure 2). The first pair of arms are connected to the second pair of arm at 45 and 43 and at 44 and 46.

It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the shipping unit taught by Pigott with the corner protector taught by Hunt to provide a means to protect the corner of the article being transported from damage.
